1.30pm to 3.00pm

IN-PERSON
Blood Cancer NZ Head Office

ONLINE
Via Zoom

— ABOUT THE WORKSHOP

Blood Cancer NZ and WaldosNZ are pleased to invite you to our patient education workshop with leading experts in Waldenström macroglobulinemia. Whether you are newly diagnosed, navigating treatment options, or somewhere in between, this free workshop is designed for you. Hear from leading WM experts and leave feeling more informed and better equipped to take an active role in your own care.

— WHAT WE'LL COVER

- Understanding your diagnosis
- Current and future treatment options
- Immunity and social impact
- SOUNDER clinical trial overview
- WhiMSICAL study and app
- Q&A session

Free to attend

In-person: please RSVP by the 5th of October to supportservices@bloodcancer.org.nz
Please note spaces are limited.

Online: Please use QR code to register via Zoom.

Both NZ & AUS patients welcome

— EXPERT FACILITATORS

Prof. Shirley D'Sa

MD, FRCP, FRCPATH

Consultant Haematologist at University College London Hospitals and Professor of Haematology at the UCL Cancer Institute

Shirley leads a specialist clinical and research programme in Waldenström's macroglobulinemia (WM) and related IgM-mediated disorders, within one of Europe's largest dedicated WM services.

Prof. Judith Trotman

MBChB, FRACP, FRCPA

Consultant Haematologist at Concord Repatriation General Hospital and founding director of the Concord Haematology Clinical Research Unit

Judith is a global leader in ALLG international lymphoma trials and treatment guidelines, dedicated to patient-clinician research partnerships and senior investigator of the international WhiMSICAL study in Waldenström's macroglobulinemia.

The workshop presentations will be recorded and made available after the event.
